Child Life Certification Exam Live Prep Course

Our Live Child Life Exam Prep Course is designed as a foundational review and support course. It is best suited for students who:

- Are taking the Child Life Certification Exam for the first time, or
- Have taken the exam one or two times and are looking to strengthen their understanding of core content and test strategy.

If you have taken the Child Life Certification Exam three or more times, this course may not be the best fit for your needs. At that point, many students benefit from more individualized, intensive, or specialized support beyond the scope of this foundational course. While you are welcome to enroll, we want to be transparent that this class alone is unlikely to address the deeper gaps typically present after multiple exam attempts.

This course is not a guarantee of passing the exam. Your experience — and outcomes — depend heavily on how you engage with the material. We have collected data from past cohorts and consistently see that students who:

- Ask questions
- Participate in live sessions
- Engage in discussion and reflection

tend to perform better on the Child Life Certification Exam.

In short: you make the course what you want it to be. The more you show up, interact, and use the support offered, the more value you are likely to gain.

We look forward to supporting you and welcome any questions you may have! To get in touch email us at info@heartsconnected.org.
